The partner

The PEME scheme is run and administered in partnership with The Marine Advisory Medical Service, a UK based company that specialises in medical repatriation and the accreditation of medical facilities based outside of the UK.

Scheme flow chart

Benefits and practicalities of the scheme

The Standard Club enhanced PEME scheme has been designed to provide specific benefits for both members and the seafarers they employ. Members benefit from having all the necessary information relating to the risk associated with the employment of a specific seafarer.

Benefits for seafarers include increased monitoring of their health and the opportunity to obtain treatment for existing medical conditions before they go to sea, where medical assistance is harder to arrange, particularly in the event of an emergency.

The tests and examinations included as part of the club's enhanced PEME scheme are designed to detect the most common pre-existing conditions in seafarers. The enhanced PEME scheme is in line with guidance issued by the International Group of P&I Clubs.

Whilst the club's scheme is advisory, in circumstances where a seafarer fails to obtain a Standard Club PEME certificate but is still compliant with DOH requirements, the club will issue specific advice to the member. This advice is designed to mitigate the risk associated with the seafarer's medical condition and ensure that the seafarer's medical needs are considered.

The scheme is now set up and running in four countries; India, Indonesia, Philippines and Ukraine.
