Dear Sir/Madam,

Marine Department Mobile Application “eSeaGo”

I am pleased to inform you that the Marine Department (MD) will launch a new mobile application, “eSeaGo” today (2nd January 2019) for displaying chart information for the Hong Kong waters free of charge.

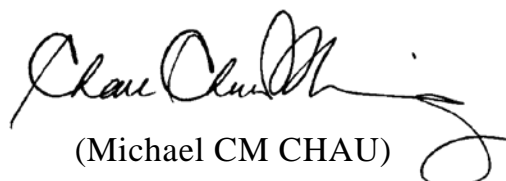

“eSeaGo” is a simple and convenient solution. Users can download the chart information provided by the Hydrographic Office of the MD via the app. With mobile device’s positioning function, “eSeaGo” will facilitate sailing in Hong Kong waters. Meanwhile, the information on “eSeaGo” can also be read in an offline mode.

“eSeaGo” provides the contents and information in raster images which shall not be a substitute for paper nautical chart or electronic navigational chart. The “eSeaGo” is therefore not for navigational purpose and as a substitute for any navigational equipment that is required under applicable regulations or laws.

“eSeaGo” for Android phones and iPhone are available for free download from Google Play and the App Store respectively. The app provides Traditional Chinese, Simplified Chinese and English versions. For more information about other functions of “eSeaGo”, please visit www.hydro.gov.hk/eng/eseago.php.

For enquiries on “eSeaGo”, please email to hydro@mardep.gov.hk or contact Ms. Kelly Poon at tel: 2504 0224.

Yours sincerely,

(Michael CM CHAU)

for Director of Marine
